HOW PILLS ARE MADE.

The Custom of taking medicine in the form of pills dates far back in history. The object is to enable us to swallow easily in a condensed form disagreeable and nauseous, but very useful drugs To what vast dimensions pill-taking has grown may be imagined when we say that in England alone about 2,000,000,000 (two; thousand million) pills are consumed every year. In early days pills were made slowly by hand, as the demand was comparatively small. To day they are produced with infinitely greater rapidity by machines especially contrived for the purpose and with greater accuracy, too, in the proportions of the various ingredients employed.

No form of medication can be better than a pill, provided only it is intelligently prepared But right here occurs the difficulty. Easy as it may seem to make a pill, or a million of them ly commended for popular use. Most of them. everybody takes pills of some kind, it may be well to mention what a good, safe, and reliable till should be. Now, when one feels dull and sleepy, and has more or loss pain in the headsides, and back, he may be sure his bowels are constipated, and his liver sluggish. To remedy this unhappy state of things there is nothing like a good cathartic pill. It will set like a charm by stimulating the liver into doing its duty, and ridding the digestive organs of the accumulated poisonous matter.

But the good pill does not gripe and pain us neither dees it make us sick and miserable for a few hours or a whole day. It acts on the entire glandular system at the same time, else the after-offects of the pill will be worse than the disease itself. The griping caused by most pills is the result of irritating drugs which they contain. Such pills are harmful, and should never be used. They sometimes even produce hemorthoids. Without having any particular desire to praise one pill above another, we may, nevertheless, name Mother Seigel's Pills, manufactured by the well-known house of A. J. White Limited, 35, Farringdon Road, London, and now sold by all chemists and medicine vendors, as the Bank Buildings, Queen's Road Central, or conly one we know of that actually possesses every FRIDAY, the 31st instant, at 12 o'olock desirable quality. They remove the pressure upon the brain, correct the liver, and cause the bowels to act with ease and regularity. They never gripe or produce the slightest sickness of the stomach, or any other unpleasant feeling or symmetm. Neither do they induce further constir cion, as nearly all other pills do. As a further and crowning merit, Mother Seigel's Pills are covered with a tastoless and harmless coating which causes them to resemble pearls, thus rendering them as pleasant to the palate as they are effective in ouring disease. If you have a severe cold and are threatened with a ORDINARY MEETING of SHAREfever, with pains in the head, back, and limbs, HOLDERS in this Company will be held at one or two doses will break up the cold and pre- the Company's Offices, on FRIDAY, 31st vent the fever. IMPERIAL QUARTO. EANGLISH AND CHINESE DICTIONARY. -THE PUNTI AND MANDAEIN

PRONUNCIATION. An Anglo-Chinese Dictionary, published at the Daily Press Office. Hongkong.

For comprehensiveness and practical service. this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to som to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extenso. Each and every word is fully illustrated and explained, forming exercise for students of a most instructive nature. Both the Court and Punti pronunciations are given the accepts being carefully marked on the hest principle hitherto attained. The typography displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore characterized Chinese publications.

To illustrate the vast scope of the work the following facts are submitted for consideration :--Chalmers' Vocabulary contains about 18.000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50.000 English of VIEWS come NEW SCENES and Photos, examined at 11 a.m. on the 18th inst. words, and upwards of 600,000 Chinese charactof NATIVE Types, copies of which are obtainable ters.
